Seamless SAP - Tableau Integration

Xtract Universal for Tableau

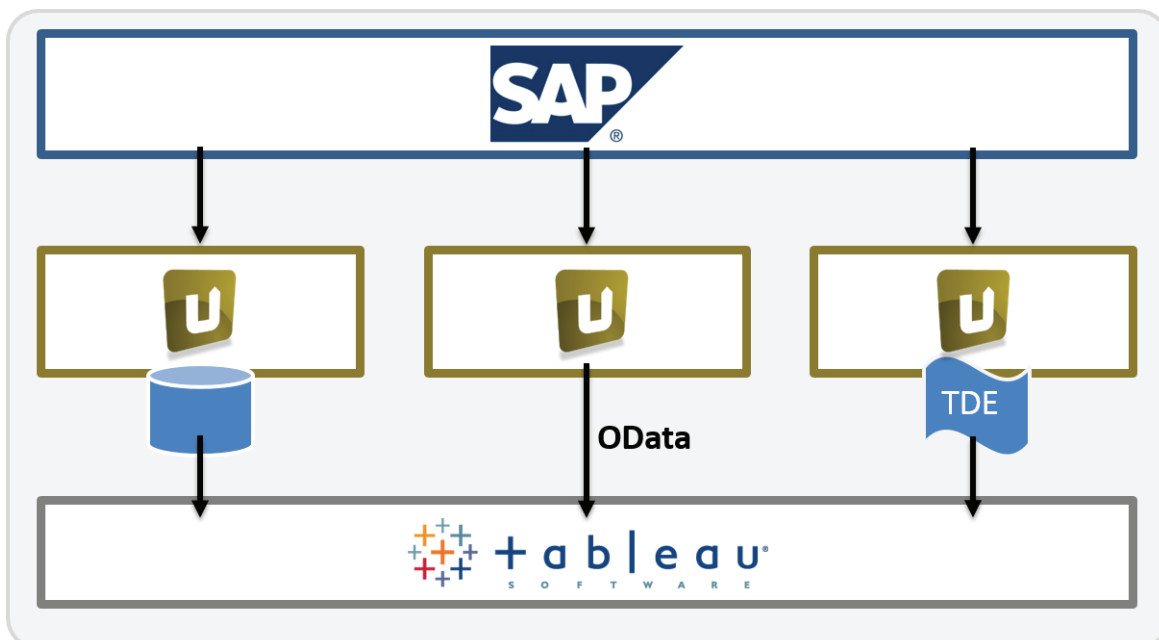

Integrate SAP data in Tableau - fast, straight-forward and user-friendly. Xtract Universal enables you to bring data streams from SAP to your Tableau environment, and thereby significantly reduce development time, thanks to a high degree of automation.

The result is maximum ROI with minimum risk and cost.

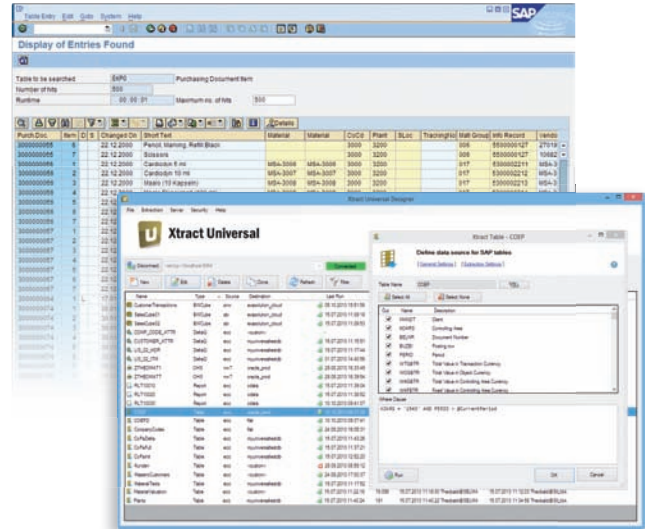

Data stream modeling

Generally speaking, data flows between SAP and Tableau can be modeled in different ways depending on the desired architecture and how it will fit into an existing customer landscape.

- » Fill an arbitrary data warehouse (e.g. Oracle, SQL Server, etc.) using the concept of Instant Data Warehousing, and subsequently accessing the data with Tableau.
- » Directly stream data between SAP and Tableau which does not require any intermediate storage. The data is transported through the standard OData protocol.
- » Create so-called TDE data files, a format developed by Tableau that contains highly compressed data which can be directly consumed by the Tableau engine.

- » Based on SAP certified technology
- » Very fast installation and configuration
- » Fast, simple & user-friendly; programming knowledge not necessary
- » Minimal to zero intrusion in your SAP system
- » Cross-module and module independent
- » Business logic is available
- » Central monitoring and process monitoring for complete control of SAP access
- » Cost savings through optimal integration, no friction losses

Scaling and security: Enterprise-ready

Xtract Universal can meet all IT and advanced user requirements:

- » Central monitoring of all extraction activities and detailed logging
- » Wide variety of extraction types that can be used to extract data from all SAP modules and SAP BW
- » Security and user management with optional active directory linking for handling highly sensitive data
- » Integrated data type safety and traceability, from source to destination

Integration of SAP ERP and BW

The Xtract Universal Component Suite offers nine components to provide all kinds of SAP interface technologies, such as Tables, Queries, BAPIs, ABAP Reports or Hierarchies. Besides that a Delta-Mechanism is also available and forms the top class of the BI components for SAP-Tableau-Integration.

Xtract Universal for Tableau

License and costs

- » 1 license **per local machine** or **server**.
- » For current Xtract Universal prices, please visit our website or contact us.

Maintenance

6 months maintenance & support included.

- » Always up to date.
